## IN THE CLAIMS

This listing of claims replaces all prior listings:

1. (Currently Amended) A method for downloading a file to a <u>personal data assistant (PDA)</u> ~~PDA~~ comprising:

<u>receiving a user input that indicates a user preference of desired functions of a set of functions that are associated with an application corresponding to said file;</u>

determining <u>at least one function of said set of functions responsive to said user input</u> ~~a subset of functions associated with said file from a set of functions associated with an application corresponding to said file~~; and

dynamically downloading said file and <u>the at least one function</u> ~~said subset of functions~~ to said PDA.

2. (Canceled).

3. (Currently Amended) The method of claim 1 wherein said determining said <u>at least one function</u> ~~subset of functions~~ further comprises:

obtaining said <u>at least one function</u> ~~subset~~ comprising a family of functions.

4. (Currently Amended) The method of claim 2 wherein said determining said <u>at least one function</u> ~~subset of functions~~ further comprises:

displaying said <u>at least one function</u> ~~subset of functions~~ as a list.

5.      (Currently Amended)  The method of claim 3 wherein said determining said <u>at</u> <u>least one function</u> ~~subset of functions~~ further comprises:

using said family to recognize one or more additional functions automatically.

6.      (Original)  The method of claim 5 further comprising:

prompting a user to select said one or more additional functions.

7.      (Original)  The method of claim 5 wherein said family comprises at least one of mathematical, trigonometric, statistical, mathematical, financial, and scientific functions.

8.      (Currently Amended)  The method of claim 1 wherein said dynamically downloading said file and <u>the at least one function</u> ~~said subset of functions~~ further comprises:

prompting a user to choose whether to download said file and/or said <u>at least one function</u> ~~subset~~.

9.      (Currently Amended)  A computer program product comprising:

a computer usable medium having computer readable program code embodied therein configured to <u>download a file to a personal data assistant (PDA)</u> ~~integrate dynamic function loading in spreadsheets on small devices~~, said computer program product comprising:

<u>computer readable code configured to cause a computer to receive a user input that</u> <u>indicates a user preference of desired functions of a set of functions that are associated with an</u> <u>application corresponding to said file;</u>

computer readable code configured to cause <u>the</u> ~~to~~ computer to determine <u>at least one</u> <u>function of said set of functions responsive to said user input</u> ~~a subset of functions associated~~ ~~with said file from a set of functions associated with an application corresponding to said file~~; and

computer readable code configured to cause <u>the</u> ~~a~~ computer to dynamically download said file and <u>the determined at least one function</u> ~~only said subset of functions~~ to said PDA.

10.     (Canceled).

11.     (Currently Amended)  The computer program product of claim 9 wherein said computer readable code configured to cause <u>the</u> ~~a~~ computer to determine <u>said at least one</u> <u>function</u> ~~a subset of functions from a set of functions~~ further comprises:

computer readable code configured to cause <u>the</u> ~~a~~ computer to obtain said <u>at least one</u> <u>function</u> ~~subset~~ comprising a family of functions.

12.     (Currently Amended)  The computer program product of claim 10 wherein said computer readable code configured to cause <u>the</u> ~~a~~ computer to determine <u>at least one function</u> ~~a~~ ~~subset of functions from a set of functions~~ further comprises:

computer readable code configured to cause ~~a~~ computer to display said <u>at least one</u> <u>function</u> ~~subset of functions~~ as a list.

13.    (Currently Amended)  The computer program product of claim 11 wherein said computer readable code configured to cause <u>the</u> a computer to determine <u>said at least one function</u> a subset of functions from a set of functions further comprises:

computer readable code configured to cause <u>the</u> a computer to use said family to recognize one or more additional functions automatically.

14.    (Currently Amended)  The computer program product of claim 13 further comprising:

computer readable code configured to cause <u>the</u> a computer to prompt a user to select said one or more additional functions.

15.    (Currently Amended)  The computer program product of claim 13 wherein said family comprises at least one of mathematical, trigonometric, statistical, mathematical, financial, and scientific functions.

16.    (Currently Amended)  The computer program product of claim 9 wherein said computer readable code configured to cause <u>the</u> a computer to dynamically download said file and <u>the at least one function</u> only said subset of functions to said PDA further comprises:

computer readable code configured to cause <u>the</u> a computer to prompt a user to choose whether to download said file and/or said <u>at least one function</u> subset.
